## # Start

0 Steps

Required Dependencies:

Key Management Framework  
Column Level Encryption  
Encryption Core

Roles:

ServiceNow Administrator with "admin" and "security\_admin" role to install.

The application contains two roles:

1) "x\_dego\_lockbox.admin" - This role is the administrator of the application itself. The primary use case would be to configure the table mappings.

2) "x\_dego\_lockbox.standard\_user" = This role is for users that will be creating encrypted entries such as a service desk agent.

---

 Plugin installation is required before proceeding with installation guide.

## # Request the Plugin from the ServiceNow App...

1 Step

In order to install the application, you must first request the application from the ServiceNow store.

Guides can be found here:

[ServiceNow Store App installation - Support and Troubleshooting](#)

[Activate a Plugin](#)

---

## STEP 1

### Navigate to the ServiceNow Store: [https://store.servicenow.com/sn\\_app-store\\_store.do](https://store.servicenow.com/sn_app-store_store.do)

Search for the application named, "LockBox". You must click "Request App" to purchase app. Alternatively, you can request a trial by click the "Try Now" option.

The screenshot displays the ServiceNow Store interface for the LockBox application. On the left, the application header includes the LockBox logo, the name "LockBox", and the tagline "Secure, Encrypted, Accountable: Elevate Your Data Security with LockBox". Below this, it lists "DevGoats LLC" as the provider, with compatibility for Vancouver, Utah, and Tokyo, and a pricing model of "Paid". A "No Reviews" section is visible below the header. The main content area is divided into sections: "Summary", "Benefits", and "Screenshots". The "Summary" section describes LockBox as a solution for secure data submission and storage. The "Benefits" section lists four key features: Enhanced Data Protection, Improved Compliance Posture, Time and Cost Efficiency, and Scalability. The "Screenshots" section shows three images of the application's user interface. On the right side of the page, there are two prominent buttons: "Request App" and "Try Now". Below these buttons, a note states: "Upon approval of request by seller, application will be available for installation. Follow KB0030208 for any assistance." A "Contact Seller" link is also present. Further down, the page lists application details: Type (Standalone Application), Version (1.0.0), Licensing (View Licensing Requirements), Compatibility (Vancouver, Utah, Tokyo), Terms and Conditions (View Terms and Conditions), Supporting Links and Docs (How To Guide.pdf), and Support Contacts.

**Summary**  
In today's digital age, safeguarding sensitive information is paramount. LockBox, an innovative application, provides the ultimate solution for secure data submission and storage. Designed with end-user confidentiality in mind, LockBox allows you to effortlessly submit critical data, which is then encrypted and stored in a highly secure table.

Benefits:

- Enhanced Data Protection:** Using KMF security measures significantly reduce the risk of data breaches and cyber threats, offering an added layer of protection for sensitive information.
- Improved Compliance Posture:** LockBox assists in maintaining compliance with various data protection regulations. This can help avoid costly legal penalties and enhance the organization's reputation for data security.
- Time and Cost Efficiency:** By streamlining the data submission and storage process, LockBox saves time and resources. This efficiency is especially beneficial for organizations that handle large volumes of sensitive data regularly.
- Scalability:** LockBox's scalable architecture means it can associate secure data entries to any table within the platform, making it a versatile tool for any organization regardless of customization.

**Request App**  
Upon approval of request by seller, application will be available for installation. Follow KB0030208 for any assistance.

**Try Now**  
Trial expires in 30 days, and it is available only on sub-prod instance(s).
